

Limites et interprétation graphique

Exercices 43 à 48 pages 10-11 du livre.

Exercice : Dans chacun des cas suivants, déterminer la limite demandée puis préciser si la courbe admet une asymptote. Vous donnerez alors son équation.

$$\lim_{x \rightarrow -3} f(x) = \dots\dots$$

.....
.....

$$\lim_{x \rightarrow 2} f(x) = \dots\dots$$

.....
.....

$$\lim_{\substack{x \rightarrow -2 \\ x < -2}} f(x) = \dots\dots$$

.....
.....

$$\lim_{x \rightarrow +\infty} f(x) = \dots\dots$$

.....
.....

$$\lim_{x \rightarrow +\infty} f(x) = \dots\dots$$

.....
.....

$$\lim_{x \rightarrow +\infty} f(x) = \dots\dots$$

.....
.....

$$\lim_{x \rightarrow -\infty} f(x) = \dots\dots$$

.....
.....

$$\lim_{x \rightarrow -\infty} f(x) = \dots\dots$$

.....
.....

$$\lim_{x \rightarrow -\infty} f(x) = \dots\dots$$

.....
.....
