

Correction

Sujet 5

Ex 1 Partie A

$$2) P(C) = P(A \cap C) + P(B \cap C) = 96 \times 9914 + 94 \times 9121 = 99$$

$$3) P(A) = \frac{P(A \cap \bar{C})}{P(\bar{C})} = \frac{94 \times 9121}{91} = 9484$$

$$4) X \sim \mathcal{C}P(n=10; p=99)$$

$$P(X=8) = \binom{10}{8} 99^8 \times 91^2 \approx 9194$$

Partie B

$$1) f(1) = 1 \Rightarrow A(1,1) \in G_f$$

$$f'(1) = 0$$

$$\text{Avec règle de l'Hôpital : } a = 4 \quad b = -3$$

$$2) \int_{0,43}^3 f(x) dx = 4,36$$

$$\text{Aire hachurée : } (3 - 0,45) \times f(3) - 4,36 \approx 2,6$$

Ex 2

QCM

1) b
